Harvey Milk, a U.S. Navy Veteran who served during the Korean War, was the first known openly gay man elected to public office in the United States. In 1977 Milk won a seat on the San Francisco Board of Supervisors thanks to a canny political combination of immigrant, elderly, minority, union and gay voter support. His vast grass-roots based campaign and subsequent victory signaled a coming-of-age for San Francisco's GLBT population. Affable and shrewd, politically adept and a skilled negotiator, Milk was destined to enjoy a bright future both within San Francisco’s political realm as well as on the national stage. But it was not to be. On November 27, 1978, a mere 11 months after taking office, Harvey Milk was assassinated along with San Francisco Mayor George Moscone. Disgruntled former City Supervisor Dan White was ultimately convicted, not of first-degree murder, but of the lesser charge of voluntary manslaughter – a verdict that triggered riots in the gay community. White served five years, only to commit suicide a year after his release from prison. Despite Milk’s short career in politics, he became an icon in San Francisco and "a martyr for gay rights" world-wide. Activist Cleve Jones observed “Though we tend to see our heroes as these mythic people, Harvey was an ordinary man, who faced challenges, defeats and humiliations like the rest of us ...but he took the heart of San Francisco.” Anne Kronenberg, who managed Milk’s final campaign, wrote: "What set Harvey apart... was that he was a visionary. He imagined a righteous world inside his head and then he set about to create it for real, for all of us." Milk was posthumously awarded the Presidential Medal of Freedom in 2009. He remains the most famous openly gay person ever elected to office – an inspiration to the hundreds of men and women who can trace their own courageous forays into public service back to the historic election of Harvey Milk.

Lesson Plan
